AUCLOUD

AUCloud's Managed Security Operations Centre (SOC) as a service provides peace of mind and unrivalled security performance for organisations Australia-wide.

No matter how large or small your business, we offer the most comprehensive Managed Security Operations Centre (SOC) service by combining cutting-edge technology and highly skilled security analysts.

AUCloud's Managed SOC service offers the most cost-effective and practical way to continuously monitor your data and environments to prevent, detect, respond and recover rapidly, to cyber threats.

CONTINUOUS SECURITY MONITORING
Staying ahead of new threats, risks, and vulnerabilities ensure threats are quickly identified

COMPLEMENTARY 'ADD-ONS'
Options are available for network traffic analysis, endpoint detection capability and scanning services

24/7 INCIDENT DETECTION & RESPONSE
Real-time detection and protection help minimise impact on your entire IT infrastructure

EXPERT ANALYSIS & PLAYBOOKS
Providing recommended courses of action for specific threats, enabling rapid response

SIEM MONITORING & AUDITING
Documenting incident responses to assist with post-mortem assessment

CERTIFIED & ACCREDITED
AUCloud is IRAP & ISO 27001 assessed and certified

AUCloud's Managed SOC protects Australian organisations against cybercrime, ensuring critical data and business operations remain secure.

AUCloud's Managed SOC platform is deployed on Australian sovereign cloud infrastructure, so you can have complete confidence in the people, processes and technologies protecting your data.

What are the benefits of outsourcing your SOC?

IMPROVED SECURITY with real-time threat detection as it occurs

INDUSTRY-LEADING TOOLS & TECHNIQUES protecting your business from the latest cyber threats

EXPERIENCE SIGNIFICANT COST SAVINGS through economies of scale and shared resources

MITIGATE THE RISK of security incidents and data breaches with proactive monitoring and threat detection

FOCUS ON CORE BUSINESS ACTIVITIES and leave the security operations to our experts

FLEXIBILITY TO SCALE security operations up or down as needed, without investing in additional resources
